27+ CANCER TYPES

5 LANGUAGES

100% FREE

What is YoursCancerCare?

YoursCancerCare is a free, private, India-aware companion for cancer patients and their families. In under a minute, it turns an overwhelming diagnosis into a calm, personalised action plan — medical clarity, financial help, nutrition guidance and emotional support, all in one place, in your language.

Every Feature, at a Glance

Feature	What it does	How it helps you
Personalised profile	One short form: cancer type, stage, age, city, comorbidities.	Everything below is tailored to your case.
Treatment explainer	Plain-language summaries of surgery, chemo, radiation, immunotherapy, targeted therapy.	Walk into the doctor's room already understanding your options.
INR cost ranges	Realistic Indian cost bands for each treatment.	Plan your budget — no surprises.
Government schemes	PMJAY, RAN, HMCPF, CGHS & state schemes matched to your city.	Find the schemes you qualify for — with documents needed.
Clinical trials	Live recruiting trials near you from ClinicalTrials.gov.	Never miss a chance at cutting-edge care.
Diet plan	Calorie & protein targets (Mifflin-St Jeor + ESPEN) with an Indian meal plan.	Eat right for your treatment, BMI and symptoms.
Fundraising	Verified Indian crowdfunding platforms (Ketto, ImpactGuru, Milaap, GiveIndia).	When treatment is unaffordable — start a campaign in minutes.

Feature	What it does	How it helps you
Helplines	Verified 24×7 cancer helplines and NGO directories.	Talk to someone when you need to.
Cancer dashboard	Global, India and state-wise stats across 21+ cancer types.	See the bigger picture — trends, survival, hope.
Hope & motivation	Survivor stories, survival stats and a small-wins tracker.	Proof that people like you are thriving today.
Dr. CareCompanion	AI companion (Gemini via Lovable AI Gateway) that knows your case.	Ask anything — symptoms, food, schemes — 24×7.
News & research	Latest research updates for your specific cancer type.	Stay informed about new options.
5 languages	English, Tamil, Telugu, Kannada, Malayalam.	Use the app in your own language.
Print my plan	One-click printable version of your full plan.	Take it to your next doctor visit.

How to Use YoursCancerCare

You don't need an account, an app download, or any payment. Just open **yourscancercare.in** in any browser — on phone or laptop — and follow these steps.

Step 1 — Open the website

Visit **yourscancercare.in**. The site loads instantly with no sign-up wall. Pick your language from the language switcher (top right) — English, Tamil, Telugu, Kannada or Malayalam.

Step 2 — Build your profile (60 seconds)

Tap "Get Started". Enter your name, age, gender, weight/height, the cancer type and stage your doctor has mentioned, any other conditions (diabetes, BP, etc.), and your city or PIN code. Don't worry if you don't know everything — you can edit later. **Your profile is saved only on your device.**

Step 3 — Explore your personalised plan

You'll land on a dashboard with sections in the top nav: **For You, Treatments, Standard Protocols, Clinical Trials, Govt Schemes, Fundraising, News & Research, Diet & Wellbeing** and **Hope & Motivation**. Everything is already filtered to your cancer type and city.

Step 4 — Understand your treatment

Open **Treatments** to see plain-language explanations of every option relevant to your stage, with INR cost ranges and what to expect. Open **Standard Protocols** for the NCCN/ESMO/Tata Memorial guideline summary.

Step 5 — Find money & help

Open **Govt Schemes** — you'll see PMJAY, RAN, HMCPF, CGHS and state schemes matched to your location, with eligibility checklists and the documents you need to apply. If you still need help, open **Fundraising** for verified Indian crowdfunding platforms.

Step 6 — Join a clinical trial (optional)

Open **Clinical Trials** to see recruiting studies near you, pulled live from ClinicalTrials.gov. Discuss any trial that interests you with your treating oncologist.

Step 7 — Build a diet plan

Open **Diet & Wellbeing**. The app calculates your daily calorie and protein targets and generates a 7-day Indian meal plan adapted to your BMI, treatment phase and common side-effects like nausea or mouth sores.

Step 8 — Chat with Dr. CareCompanion 24x7

Tap the chat icon any time. Ask anything — "Is fever after chemo normal?", "Which scheme covers radiation in Tamil Nadu?", "What should I eat with low platelets?" The AI knows your profile and answers in your language. Always confirm important decisions with your treating doctor.

Step 9 — Find hope

Open **Hope & Motivation** for survivor stories, real survival statistics for your stage, and a small-wins tracker to celebrate every step forward.

Step 10 — Print your plan for your doctor

Click **Print** in the header to generate a clean, printable summary you can take to your next hospital visit.

Who is this for, and how it helps you

If you are a patient

Walk into every doctor visit informed and prepared. Know which treatments you might be offered, what they cost, which schemes can pay, and which trials you could join. Get nutrition guidance that respects Indian food, and a calm AI companion when the questions come at 2am.

If you are a caregiver

Stop juggling 20 browser tabs. One place gives you the medical map, the financial options, the scheme paperwork, the trial list and the diet plan — for the person you're caring for. Print it, share it, take it to appointments.

If you are a family member

Even if you don't understand the medical details, the plain-language summaries, INR costs and government scheme matches let you support practical decisions from day one.

If you are a clinician or NGO worker

Use YoursCancerCare as a free patient-education and navigation resource. Share the link with patients who can't afford private consultations to explain options.

A few honest notes

Not medical advice

YoursCancerCare is an educational and decision-support tool, not a doctor. Always confirm treatment, drug and scheme decisions with your treating oncologist.

Your data stays with you

Your medical profile is stored only in your browser's local storage. No accounts, no servers holding your records, no selling of data to advertisers.

Free, and staying free

There is no paid version. No ads on medical pages. No commission from any hospital, scheme or fundraising platform.
